

CLIMATE ACTION 2030 / 2050

Vistra's goal is to achieve a **60% reduction in CO₂ equivalent emissions by 2030, compared to a 2010 baseline, with a long-term target to achieve net-zero carbon emissions by 2050***

Climate change is a defining issue of our time, impacting all global citizens, industries, and nations and it must be addressed collectively. As an integrated retail electricity provider and producer of electric power, Vistra has been committed to combating climate change through the reduction of greenhouse gas emissions from our business activities. In the last five years, Vistra has transitioned our generation portfolio from one that was largely coal to one that is predominately natural gas-fueled while also operating our first solar + storage facility, developing the largest battery energy storage facility of its kind in the world, and launching our zero-carbon portfolio, Vistra Zero. Vistra expects to continue this strategy over the next 10 years with additional coal retirements and meaningful investments in renewables and batteries.

45%
DECREASE
IN EMISSIONS

Vistra has already achieved a meaningful emissions reduction — a 45% decrease from 2010 to 2020 in CO₂ equivalent emissions, or 76% of its 2030 goal.

~4,000 MW
VISTRAZERO

ZERO-CARBON GENERATION

The Vistra Zero portfolio includes emission-free resources from the company's existing nuclear, renewable, and energy storage facilities as well as its new carbon-free development projects.

~20,000+ MW

RETIRED COAL AND GAS

Vistra has retired or announced plans to retire nearly 20,000 MW of coal and gas plants since 2010, including:

- Tradinghouse (Gas; 2010)
- Killen (Coal; 2018)
- Joppa¹ (Coal; 2022E)
- Valley (Gas; 2010)
- Stuart (Coal; 2018)
- Zimmer¹ (Coal; 2022E)
- Vermilion (Coal; 2011)
- Northeastern (Coal; 2018)
- Baldwin¹ (Coal; 2025E)
- Morro Bay (Gas; 2013)
- Duck Creek (Coal; 2019)
- Coletto Creek¹ (Coal; 2027E)
- Wood River (Coal; 2016)
- Coffeen (Coal; 2019)
- Kincaid¹ (Coal; 2027E)
- Brayton Point (Coal; 2017)
- Havana (Coal; 2019)
- Miami Fort¹ (Coal; 2027E)
- Monticello (Coal; 2018)
- Hennepin (Coal; 2019)
- Newton¹ (Coal; 2027E)
- Sandow (Coal; 2018)
- Wharton (Gas; 2020)
- Edwards (Coal; 2022E)
- Big Brown (Coal; 2018)

2,300+ GWh
WIND POWER
PURCHASES

In 2020 alone, Vistra purchased more than 2,300 GWh of wind power for our customers, the energy equivalent enough to power more than 296,000 homes.

1,000+ MW
TEXAS RENEWABLES

Adding to our current 180-MW Upton 2 Solar and Energy Storage Facility, we are developing ~1,000 MW of solar and energy storage projects in Texas, all expected to be online by 2022, and evaluating an additional 1,000 MW of potential projects.

400 MW / 1,600 MWh

CALIFORNIA ENERGY STORAGE

Our Moss Landing batteries in California help the state meet its renewable energy goals and position Vistra as a market leader in utility-scale battery development. We have over 1,500 MW of expansion opportunity in California.

86,000

ACRES OF RECLAIMED LAND

More than 86,000 acres of our former mining sites (roughly the size of Rhode Island) have been reclaimed, much of it with tree planting.

50+ RENEWABLE
ELECTRICITY PLANS

Vistra Retail offers over 50 renewable electricity plans to our residential customers, giving consumers a personal stake in clean energy.

\$2 MILLION

IN EFFICIENCY INCENTIVES

-\$2 million reimbursed to business customers each year for energy efficiency projects.

* Assuming necessary advancements in technology and supportive market constructs and public policy.
¹ May retire earlier than the expected dates shown above if economic or other conditions dictate.
